

TrueNAS SCALE Bluefin is RELEASED into the Wild

TrueNAS SCALE Bluefin (22.12.0) has reached RELEASE. A huge thank you goes out to the 3,000+ testers that provided their time, systems, and feedback as part of this effort. Bluefin is a simple update from Angelfish (22.02.4) with more polish and numerous bug fixes and provides a wide range of new capabilities that will continue through the normal software lifecycle to maturity. Click below to read all about what is new in Bluefin!

iX adds TrueNAS R30 and AX-1212

iX has added two new platforms to the TrueNAS appliance family!

The TrueNAS Family Lineup

The new TrueNAS R30 is an all-NVMe appliance that delivers extreme performance density with 16 NVMe drives in a compact 1U chassis. The AX-1212 is a 64 Core 1U server designed for virtualization, is certified for VMware, and delivers valuable low-cost per vCPU and high bandwidth per VM as a complement to any TrueNAS environment.

Video: TrueNAS SCALE 22.12 RC1 and TrueNAS CORE 13 U3.1 Updates and Release Notes

Watch this video of Tom Lawrence as he discusses TrueNAS CORE 13 U3.1 Release Notes and UI updates to TrueNAS SCALE Bluefin.

Video: Fixing my worst TrueNAS SCALE mistake!

If you have not yet signed up for a free iX-Storj account, click the link above and also get into the contest. TrueNAS CORE 13.0-U3 is available to use iX-Storj as a client. For those also interested in hosting Storj Nodes which is available in TrueNAS SCALE, this video steps through the configuration steps.

TrueNAS featured on This Week in Enterprise Tech

The hosts at TWIET love TrueNAS (by its classic name FreeNAS ;-), so we were happy to be on a recent episode to talk about our latest choices: TrueNAS CORE and TrueNAS SCALE. In this episode, iXsystems VP of Marketing Mario Blandini answered questions about TrueNAS Open Source storage for a variety of environments, while the hosts shared some of their own examples!

Last Chance for Exclusive Offer: All-Flash R10 & R40

One more week left for our special promotion on two All-Flash R-Series models, the industry's lowest-priced All-Flash NAS with 100GbE. Both models are great for analytics,

video editing & rendering, or any high-performance workloads. Both are also excellent for future clustering with TrueNAS SCALE Bluefin.

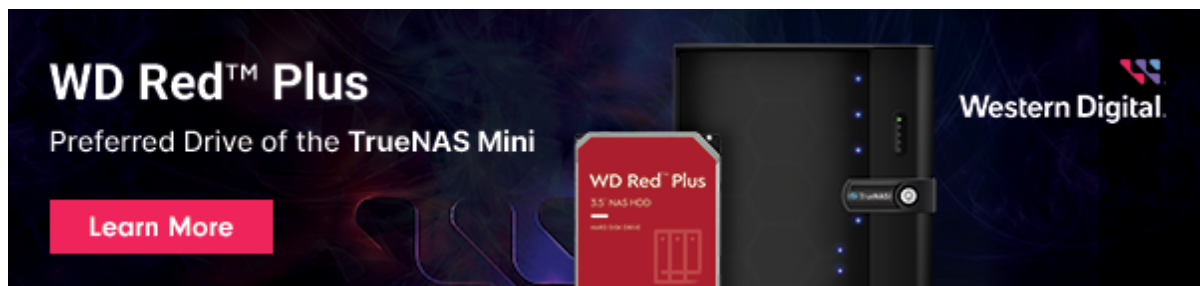

22TB R10 All-Flash = **\$9,900** and 120TB R40 All-Flash = **\$33,000**

Perfect for the end-of-year procurement, this exclusive offer is good through December 22, 2022 for TrueNAS customers and users.

Check out the new items added to our [TrueNAS Community Store](#) and give the gift of TrueNAS this holiday season!

Tech Tip #118

TrueNAS offers “nightly” images that allow adventurous users and developers to participate in early testing and feedback of future versions of TrueNAS. These images should not be used in production, and users are required to roll back to a previous “released” version before upgrading again to a stable release.

See [CORE Updates](#) and [TrueNAS Upgrades](#) for more information about how to use nightly images.
